

# ListenTALK

## TWO-WAY COMMUNICATION SYSTEM

**The versatile ListenTALK system is the perfect solution to ensure easy and clear communication.**

As ListenTALK is completely mobile it can be used indoors or outdoors allowing an interactive and engaging experience for your guests anywhere.

A ListenTALK system comprises of wireless transceivers and headsets. A wide range of accessories are available to suit any environment from a museum to a workshop.

The compact and easy-to-use transceivers can be programmed in three different modes to meet the needs of any venue or setting:

**LISTEN** The Participants can only listen to the leader

**RESPOND** The Participants can listen to and respond to the leader

**DISCUSS** The Participants can listen to and respond to the leader and the rest of the tour group

Groups can easily be configured using the docking station tray and the push of a button, or on-the-go, thanks to Near Field Communication (NFC) by tapping the leader's transceiver.
